JavaScript Assignment 1

Create an HTML document with JavaScript that calculates the sum of two variables and displays the result in the browser window.

One variable should contain an assigned numeric value.

The user should enter the value of the second variable.

Save your file as YourLastName_JS1.html, upload on your webserver and email me a link.

Reference examples:

BackgroundColor.html

welcome.html

Technical concepts:

Variables

Data Types

Arithmetic Operators (addition (+))
