

DES 350

## **Digital Media Design IV**

### **JavaScript Assignment 3**

Create JavaScript that generates random hexadecimal color (#??????) and displays sample text in that color when the user clicks on the link. Use Math.random() method to generate random hex color values between 0 and 9 (ignore letter digits).

#### **Reference examples:**

BackgroundColor.html  
random. html

#### **Technical concepts:**

Variables

Data Types

Arithmetic Operators (addition (+))

Math object
