

DES 350

## **Digital Media Design IV**

### **JavaScript Assignment 7**

Write a script that will calculate a 15% and a 20% tip.

The users type into a text field the amount that they wish to tip on.

The user selects 15% or 20% they wish to tip via a drop-down menu.

When they click on a "Calculate" button the amount of the tip and the total amount (tip plus original amount) are displayed.
